700 hPa 12 UTC

This is a detailed synoptic weather map of Europe and the North Atlantic. The map features a low-pressure system (cyclone) centered over the British Isles, with a cold front extending southwestward and a warm front extending northeastward. High-pressure systems (anticyclones) are located over the Azores and the Azores. The map includes contour lines for pressure and elevation, and various weather symbols for clouds, precipitation, and wind direction and speed.

300 hPa 12 UTC
