

ALLGEMEINE ÜBERSICHT 8 Uhr morgens: Mittwoch, 27. September 1922.
Die gesamte Luftdruckverteilung über Europa hat sich nur unwesentlich verändert. Die sich vom Nordmeere bis nach Ungarn erstreckende Brücke hohen Druckes verhindert ein Vordringen der atlantischen Depression nach Osten. Letztere bewegt sich nur langsam südwärts. Die östliche bis südöstliche Luftströmung reicht über Nord- und Mitteldeutschland bis in größere Höhen. Bei Fortbestand der östlichen Winde wird die herrschende Witterung anhalten.

WETTERAUSSICHTEN AN DER DEUTSCHEN KÜSTE für Donnerstag, 28. September 1922

NORDSEE: Schwache bis mäßige östliche Winde, heiter, nachts sehr kühl, trocken.
westl. OSTSEE: Wie Nordsee.
östl. OSTSEE: (Wetterwarte Königsberg) Noch keine erhebliche Witterungsänderung, Nachtfrostgefahr.
Sturmwarnungen:
