Neuigkeiten aus dem Geschäftsfeld Klima- und Umweltberatung

Neu ab Januar 2003: Gradtagzahlen

Ab Januar 2003 geben wir Ihnen regelmäßig auf Seite 24/25 die Gradtagzahlen von 36 ausgewählten Stationen an. Die Gradtagzahl GTZ stellt den Zusammenhang der Außenlufttemperatur mit der gewünschten Raumtemperatur her. Nach den VDI-Richtlinien soll geheizt werden ("Heiztag"), wenn die Außentemperatur im Tagesmittel unter 15°C liegt. Eine Raumtemperatur von 20°C wird als behaglich definiert. Die Gradtagzahl ist die Summe der Differenzen zwischen der Raumtemperatur von 20°C und den Tagesmitteln der Lufttemperatur, gebildet über alle Heiztage.

Die angekündigte Tabelle enthält für den jeweiligen Monat die Zahl der Heiztage (Tagesmittel unter 15°C), die Mitteltemperatur über alle Heiztage, die Gradtagzahl GTZ sowie zum Vergleich die mittlere monatlich GTZ aus dem Zeitraum von 30 Jahren (1961-1990).

Neuigkeiten aus dem Geschäftsfeld Klima- und Umweltberatung

Wenn der Witterungsreport nicht ausreicht, gibt es beim Deutschen Wetterdienst die **Allgemeine Klimaauskunft**. Sie umfasst:eine ausführliche Beratung, in Tabellen zusammengestellte umfangreichere Messwerte und Beobachtungsdaten von weit mehr Stationen als im Witterungsreport.

Wir helfen Ihnen, für Ihre Anfrage herauszufinden,
- die Daten welcher Station am besten geeignet sind
- welche Wetterelemente mit welcher zeitlichen Auflösung günstig sind
- welche Vergleichswerte zu einzelnen Messdaten passen
- welches das beste Preis-/Leistungsverhältnis für Sie ist

Größere Datenmengen werden als ganze Vielfache der Allgemeinen Klimaauskunft "groß" abgegeben. Schon ab 5 Stück davon gewähren wir Rabatte.
Die Allgemeine Klimaauskunft wird je nach Datenumfang in drei Varianten angeboten:

- **Allgemeine Klimaauskunft " klein":**
nicht mehr als 31 Minuten-, oder Stunden- oder Tageswerte oder nicht mehr als 12 Monatswerte oder nicht mehr als 1 Jahreswert. **26.68 € (23.00 € + 16% MwSt)**
- **Allgemeine Klimaauskunft " mittel":**
nicht mehr als 366 Minuten- oder Stunden- oder Tageswerte oder nicht mehr als 36 Monatswerte oder nicht mehr als 3 Jahreswerte. **58.00€ (50.00€ + 16% MwSt)**
- **Allgemeine Klimaauskunft "groß":**
nicht mehr als 7500 Minuten- oder Stundenwerte oder nicht mehr als 2500 Tageswerte oder nicht mehr als 96 Monatswerte oder nicht mehr als 8 Jahreswerte.

Neuigkeiten aus dem Geschäftsfeld Klima- und Umweltberatung

Wenn der Witterungsreport nicht ausreicht, gibt es beim Deutschen Wetterdienst die **Allgemeine Klimaauskunft**. Sie umfasst:eine ausführliche Beratung, in Tabellen zusammengestellte umfangreichere Messwerte und Beobachtungsdaten von weit mehr Stationen als im Witterungsreport.

Wir helfen Ihnen, für Ihre Anfrage herauszufinden,
- die Daten welcher Station am besten geeignet sind
- welche Wetterelemente mit welcher zeitlichen Auflösung günstig sind
- welche Vergleichswerte zu einzelnen Messdaten passen
- welches das beste Preis-/Leistungsverhältnis für Sie ist

Größere Datenmengen werden als ganze Vielfache der Allgemeinen Klimaauskunft "groß" abgegeben. Schon ab 5 Stück davon gewähren wir Rabatte.

Die Allgemeine Klimaauskunft wird je nach Datenumfang in drei Varianten angeboten:

- **Allgemeine Klimaauskunft " klein":**
nicht mehr als 31 Minuten-, oder Stunden- oder Tageswerte oder nicht mehr als 12 Monatswerte oder nicht mehr als 1 Jahreswert. **26.68 € (23.00 € + 16% MwSt)**
- **Allgemeine Klimaauskunft " mittel":**
nicht mehr als 366 Minuten- oder Stunden- oder Tageswerte oder nicht mehr als 36 Monatswerte oder nicht mehr als 3 Jahreswerte. **58.00€ (50.00€ + 16% MwSt)**
- **Allgemeine Klimaauskunft "groß":**
nicht mehr als 7500 Minuten- oder Stundenwerte oder nicht mehr als 2500 Tageswerte oder nicht mehr als 96 Monatswerte oder nicht mehr als 8 Jahreswerte.
